### How to utilize Green Care in action:

In the spring of 2009 Ayii Anargyri Spa resort opened its doors to present the world with a sublime experience. Set in a valley of mature trees, the resort offers a unique retreat, a place of profound calm and the opportunity to enjoy the health-giving waters which have benefited visitors for so many years. The Spa was first formally opened in 1649 by two brothers, Cosmas and Damianos. Their generosity in offering treatment often without thought of reward gave rise to the name Anargyri – without silver. They became known and loved locally for their selfless acts and affectionately known as saints.

### Good practices and benefits of Green Care:

The hotel provides the means to benefit from the time-tested remedies of the mineral rich waters which flow here – but there is so much more. An abundance of scenic attractions will delight any nature lover.

### Ayii Anargyri Wellness, Cyprus

Established 1649
